# Protect the Personal Data of Citizens

Comply with evolving and complex government regulations.

Discover and Safeguard Sensitive Data

Content growth can be as much as 20 percent year over year, leading to spiraling, uncontrolled data silos.

Over-retention of sensitive data, records, or other information can also lead to increased fines in the case of a data breach.

Content cleanup and disposition help SLED organizations dramatically improve the management and governance of their information, specifically in terms of defensibility, discovery, findability, and compliance.

- On-prem deployment quickly provides visibility into your dark data by scanning and classifying sensitive data
- The light-weight software won't slow down your systems, scanning 1 million+ files an hour with an index size that's typically less than 3% of content volume
- Our dedicated Professional Services team will get you up and running in no time
- We highlight gaps and provide recommended actions to help you control personal data and support compliance

Quick and hassle-free

Actionable insights

Government agencies at all levels choose ActiveNav

ACTIVENAV

What's Included

Our proven methodology has helped hundreds of organizations reduce risk, control their data, and achieve compliance with regulations like CCPA, HIPAA, and PCI.

- Installation of ActiveNav on-prem with a 6-month license and up to 5TB analyzed

- Creation of a data map to highlight data types and age profile of content

- Identification and remediation of Redundant, Obsolete, and Trivial (ROT) content

- Sensitive data identification providing insights into the extent and nature of PII and other sensitive information

- Application of our unique COVID-19 ruleset to support future FOIA or other COVID related information requests

- Up to 16 hours of Professional Services to support user training and implementation

"ActiveNav was very helpful. Being able to show how many resources are getting bogged down by files was eye-opening. Anything you want to do for records at scale, this is the right tool. The software really highlighted significant gaps in our internal workflows."

- Tanya Marshall
Chief Records Officer and State Archivist
State of Vermont

Case Study

Discover, classify, and manage regulated data

Achieve visibility and insight into what data you are currently storing and managing. ActiveNav quickly scales to the petabyte range.

Straightforward policy enforcement

Quickly establish a data map of your data. Design and act on policies driven by what content you actually have, not what you think you have.

Lower risk, cost, and effort

Content cleanup reduces storage costs, improves efficiency, and enables digital transformation. Enrich content so that its discoverable and actionable in the future.

Resolve data spillage and PII

Remediate sensitive data and reduce data risk in the event of a breach. Identify records/sensitive data for regulatory compliance and proactive e-Discovery savings.

Reduce or eliminate data silos

Defensible deletion of e-trash, ROT, stale, and low value content. Ensure proper handling of information contained in IT systems.

Streamline data privacy compliance

Quickly respond to Freedom of Information Act (FOIA) requests. Support regulatory compliance with on-going data governance.
