Dark Data Discovery and Compliance for the Legal Sector

Entrusted with highly confidential and sensitive client data, legal firms have always had a need to demonstrate strong data security and governance practices. However, with more stringent privacy regulations and an increasing risk of data breach, clients are demanding assurance and increased transparency into those practices. This means that governance and compliance teams need to have a clear understanding of their data assets, especially unstructured data across file shares, email, chat and even more formal repositories like iManage. Unfortunately, to date, getting a clear and consistent view across all of these repositories has been all but impossible without disproportionate investment in both time and money.

To address this need, ActiveNav Cloud has been developed to provide a low-cost and easy to use data discovery service that:

- Maintains a current inventory of all unstructured data assets, wherever they lie.
- Provides governance and compliance teams with a consolidated view of data composition and sensitivity.
- Enables data mapping and data subject access request fulfillment for data privacy compliance.
- Generates sensitive data reports to respond to client audit requests.
- Drives data minimization and disposal of unwanted, stale and spilled sensitive data in accordance with records retention policies.

Deployed as a multi-tenant cloud service, ActiveNav Cloud requires minimal to no infrastructure investment and can be up and running almost immediately, delivering a series of rich dashboards to provide unrivalled data insights within minutes.

Compliance View provides an interactive map of regulated sensitive data across repository and jurisdiction

Analyst View enables information professionals to drill into compliance issues and direct defensible data disposal

Profile View shows data footprint and composition by key age, type and size and duplication metadata

ACTIVENAV CLOUD

Built on Microsoft's secure Azure cloud infrastructure and assured by our ISO27001 information security certification, ActiveNav Cloud securely connects to a wide range of repositories, with more in development all the time.

Coming Soon

ActiveNav Cloud is a robust and cost-effective solution to enable any legal firm to reach a state of Zero Dark Data whereby it can be confident that its data governance obligations are being met and it is acting as a good steward of its client's data.

High performance unstructured data discovery	Data risk hotspot identification
On-premise and cloud repositories	Targeted search and Data Subject Access Request fulfillment
Classification and regulated data risk scoring	Aging, stale, duplication and unwanted data metrics
Single pane of glass visualization across all discovered data	Managed review and disposal decision making
Unstructured data inventory and compliance data map	Audit trail for defensible disposal

About Us

We're data experts, and our North Star is Zero Dark Data. We believe that all organizations should be aiming for a state of Zero Dark Data so that they can act as good stewards of that data to minimize their cyber risk surface area, protect the interests of their customers, their staff and their other stakeholders. We've been working continuously with unstructured data in the wild for well over a decade and we think the market deserves data discovery products that just work. As a result we are trusted by leading companies and government agencies to help them understand and control their data assets to drive regulatory compliance, reduce the cost of data ownership and improve data quality.

Aside from our fascination with Dark Data, we're engineers, designers, runners, gardeners, chefs, photographers, bikers, parents, skiers, cosplayers, hikers, gamers, travelers, mountain climbers, friends, race car drivers, readers, volunteers, and car enthusiasts. We value loyalty, accountability, and communication and care deeply about creating a sustainable future, supporting charitable causes as proud members of Pledge 1%.
