

ACTIVENAV DC PROJECT SUITE

An expert data transformation project suite, deployed in your on-premise infrastructure. DC Project Suite is purpose built for data cleanup, migration and record classification either in-place or on migration for file shares, SharePoint or OpenText Content Server.

Highly Customizable Data Discovery

DC Project Suite quickly finds and classifies unstructured data, identifying ROT and duplicates, sensitive, records, and intellectual property, and any other attribute.

Action Data in One Interface

Data disposal actions built right into highly functional reporting, enabling deletion, quarantine, migration or labelling without third-party tools.

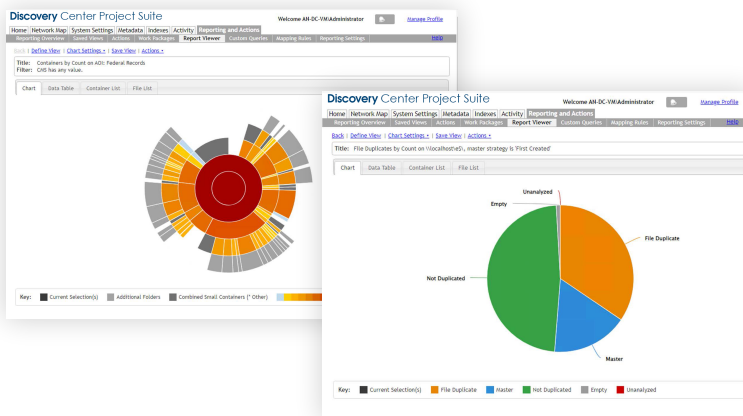

Specialist Tools for Records and Migration Mapping

For file plan migration, metadata creation or records schedules classification, DC Project Suite provides a unique data workbench.

Again, without ActiveNav I don't know that our organization would be ready today to take those next steps. Thankfully, it was a very enjoyable project because of those outcomes, and certainly the highlight of my career that, again, I was able to enjoy thanks to that partnership and the outcomes and success that we accomplished together.

Steve Gonzales,
Information Governance and Enterprise Content Management Manager at The Metropolitan Water, District of Southern California.

Simple deployment into your Microsoft stack

File Share, SharePoint, OpenText Content Server

Hundreds of out-of-the-box rules

Endlessly customizable classification

Multi-layer duplicate identification

Reporting on any metadata, classification or label

Delete, quarantine, migrate, re-structure and label actions

Integrates with Microsoft Information Protection

Retention schedule and taxonomy modelling

File plan mapping, migration and re-structuring

Use Cases

ROT Cleanup

DC Project Suite is the most mature and robust toolset on the market for cleaning up your ROT, aging and duplicate data. Reduce your data footprint for migration efficiency or storage cost reduction

Records Classification

Take your records retention schedule and model it in DC Project Suite Workbench. Develop and test classifications to understand and adjust rules coverage and performance. Automatically label or re-structure data to apply retention labels for compliance either in place or on migration to a repository of record.

Migration Preparation and Labelling

Identify and cleanup data in preparation for any migration to O365 or any cloud repository. Generate security labels, including Microsoft Information Protection, and other classification labels to tag data in place or on migration, to radically increase data value during the process.

Sensitive Data Identification

Discover, classify and label data responsive to any regulation, security policy or subject matter. DC Project Suite enables sensitive data cleanup for any project from acquisitions and mergers to cloud migration.

We couldn't have done this manually. I don't think it's possible at all to do the file analysis the way that ActiveNav was able to, even with some of the best practices and tools we have, including SharePoint.

State of Vermont

About Us

We're data experts, and our North Star is Zero Dark Data. We believe that all organizations should be aiming for a state of Zero Dark Data so that they can act as good stewards of that data to minimize their cyber risk surface area, protect the interests of their customers, their staff and their other stakeholders. We've been working continuously with unstructured data in the wild for well over a decade and we think the market deserves data discovery products that just work. As a result we are trusted by leading companies and government agencies to help them understand and control their data assets to drive regulatory compliance, reduce the cost of data ownership and improve data quality.

- 15 Years of Experience
- 6 Continents and 28 Countries
- 15+ Billion Files Discovered
- 30K+ hrs Customer Deployments
- 300+ Customers and Counting

Aside from our fascination with Dark Data, we're engineers, designers, runners, gardeners, chefs, photographers, bikers, parents, skiers, cosplayers, hikers, gamers, travelers, mountain climbers, friends, race car drivers, readers, volunteers, and car enthusiasts. We value loyalty, accountability, and communication and care deeply about creating a sustainable future, supporting charitable causes as proud members of Pledge 1%.
